## ENVIRONMENTAL DATASHEET

### PRODUCT COMPOSITION

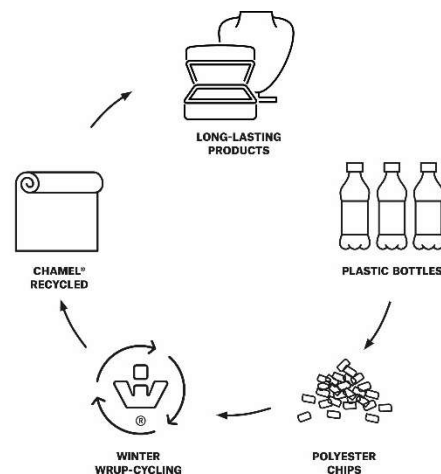

### WINTER WRUP-CYCLING

WINTER WRUP-CYCLING revives recycled materials into high-quality coverings.

This upcycling process has been developed by WINTER & COMPANY. It allows to recycle valuable raw materials, ensures that they are used for high-quality products and do not end up as waste.

Recycling of plastic waste into a new long-lasting product is an enormous contribution to reducing energy consumption and disposal of highly contaminous waste to landfill and marine world.

For the production of CHAMEL® RECYCLED, containing 84% PCW, we collect and reuse plastic bottles into a qualitative suede imitation with a soft touch.

### WASTE EQUIVALENT

The use of PET plastic bottles waste is an effective way to reduce the environmental impact.

The recycling process produces a new product, CHAMEL® RECYCLED, true to the characteristics of polyester. At the same time saving a significant amount of waste that would otherwise have gone to landfill and sea.

**POST-CONSUMER WASTE**

CHAMEL® RECYCLED contains 84% post-consumer waste.

In our modern society, we produce and consume large quantities of plastic bottles. This generates an enormous quantity of waste, which is also called post-consumer waste (PCW). The PET plastic bottles waste is used for the production of the upcycled product CHAMEL® RECYCLED. Through this process, we avoid the need of newly resourced polyester yarns and large quantities of plastic.

**REACH**

CHAMEL® RECYCLED does not contain any of the substances currently listed as SVHC's (Substances of Very High Concern) under REACH. Registration, Evaluation, Authorisation and Restriction of Chemicals is a European Union regulation dating from 18 December 2006. REACH addresses the production and use of chemical substances and their potential impacts on both human health and the environment.

**UN GLOBAL COMPACT**

WINTER & COMPANY confirms that the supply chain of CHAMEL® RECYCLED is committed to the business practices of UN Global Compact.

The UN Global Compact is the world's largest corporate sustainability (a.k.a. corporate social responsibility) initiative with 13000 corporate participants and other stakeholders over 170 countries with two objectives: "Mainstream the ten principles in business activities around the world" and "Catalyse actions in support of broader UN goals, such as the Millenium Development Goals (MDGs) and Sustainable Development Goals (SDG's).

**VEGAN**

Based on supplier's information provided, CHAMEL® RECYCLED is vegan. This material does not contain any animal products or animal-derivatives.

**RECYCLABLE**

CHAMEL® RECYCLED is fully recyclable. This means 100% of this product can be recycled by all standard recycling processes.
